

# Configuring and Connecting Apple Macintosh

## Configuring Apple Macintosh for Carib-Online

(These step-by-step instructions are not valid for Mac OS X)

### Step 1

Go to the apple menu (in the upper left corner of the screen) and go to control panels. Select "TCP-IP" from the list.

### Step 2

Now you see the TCP-IP control panel. This is what it should look like

- In the first field (connect via) you select **PPP**
- In the second field (configure) you select **using PPP**
- In the third field (IP address) there is already selected "**<will be supplied by server>**"
- In the fourth field (Subnet Mask) there is already selected "**<will be supplied by server>**"
- In the fifth field (Router address) there is already selected "**<will be supplied by server>**"
- In the sixth field (Name server addr.) you should type nothing (leave it blank)
- In the seventh field (Implicit search path, starting domain name) you should type nothing (leave it blank)
- In the eight field (ending domain name) you should type nothing (leave it blank)
- In the ninth field (Additional search domains) you should type nothing (leave it blank)

### Step 3

You close the TCP-IP control panel by clicking on the little square in the upper left corner. It will ask you if you want to save it. Click yes.

### Step 4

Go to the apple menu (in the upper left corner of the screen) and go to control panels. Select "Remote access" from the list.

### Step 5

In the remote access control panel you will have to type the following

- Registered user should be turned on (meaning that guest is turned off)
- In the name field you should type your logon name, as supplied by Carib-Online
- In the password field you should type your password.
- The save password tag should be on
- In the number field you should type the number you need to call for Carib-Online: 5700315

### Step 6

You close the remote access control panel by clicking on the little square in the upper left corner. It will ask you if you want to save it. Click yes.

### Last step

Now all that is left is connecting to the internet. All your settings are now configured correctly to easily connect to the internet.

There are several ways of connecting to the internet. One way is by going to the apple menu (in the upper left corner), select remote access status. In the panel that comes up, click on connect.

Once you are done, click disconnect on the same panel.

#### **Opening Hours:**

Monday-Friday from 8.00am–5.30pm / Saturday from 9:00am-2:00pm

#### **Helpdesk Hours:**

Monday-Friday from 8.00am–10.00pm / Saturday-Sunday from 10.00am– 10.00pm
